

Careers in Electricity

When you start thinking about a future occupation, you need to have an understanding of what kinds of jobs are out there.

Almost every type of job uses electricity.

How would the following occupations use electricity?

1. Baker
2. Police Officer
3. Store Clerk
4. Doctor
5. Principal
6. Carpenter

What careers **use** electricity, help **generate** electricity, **distribute** electricity to **consumers** or **conserve** electricity?

What do these words mean?

What careers **use** electricity, help **generate** electricity, **distribute** electricity to **consumers** or **conserve** electricity?

What do these words mean?

Generate: to make

Distribute: to give out to different people
(When giving a deck of cards to one person, that's not distributing. If I divide cards between all of you, that's distributing.)

Consumers: to use up
(can also refer to eating and drinking because you used it up.)

Conserve: to save

Lesson 3-Careers in Electricity
